ABOUT ME

FULL STACK DEVELOPMENT | EXPERT KNOWLEDGE IN REACT.JS | NATURAL LEADERSHIP

Motivated Full-Stack Web Developer with strong expertise in the MERN stack (MySQL, Express.js, React.js, Node.js) and MySQL. Skilled in building scalable, responsive web applications, integrating REST APIs, and ensuring clean, maintainable code. Passionate about delivering efficient solutions and collaborating in fast-paced, Agile environments.

EDUCATION

- Bachelor of Science in Computer Science**
Unity University
01/2022 – present | Addis Ababa, Ethiopia

PROJECTS

- Verchual Lab For Students**
Vlab
VLab is an interactive virtual laboratory where students can explore the periodic table and safely simulate chemistry experiments anytime, anywhere
- zemate**
Orthodox mzmur streaming app
Developed Zemate, an Orthodox music streaming app using Google Drive, Node.js, Firebase, and Next.js, featuring background playback and seamless user experience even with the screen closed.
- E-commerce**
E-commerce website
Designed and built a responsive e-commerce frontend with dynamic product displays, intuitive navigation, and modern UI components for an engaging shopping experience.

Clone

- Clone Projects (Apple, Netflix & Amazon)
- **Apple Clone (E-commerce Frontend):** Built a full frontend replica of Apple's product showcase using React. Managed structured product data, responsive UI, and clean product details displays.
- **Netflix Clone:** Developed a streaming interface clone using React and JavaScript. Parsed and displayed movie metadata stored in structured JSON for dynamic UI rendering.
- **Amazon Clone (E-commerce Frontend):** Created a site mirroring Amazon's frontend using React and styling libraries. Handled structured product catalogs, filtering, and data consistency across listings.
